

## UAS Laboratories Introduces New Women's Health Product

2010/02/07 - UAS Laboratories

UAS Laboratories, Inc. announces the introduction of Cran-Gyn DDS®, a revolutionary, patent pending new product for women's health during Expo West in March 2010.

Cran-Gyn DDS® combines the power of DDS® probiotics with the highest quality cranberry extract and D-mannose. Cranberry and D-mannose have extensive research in the area of urogenital health.

Research suggests that components (Proanthocyanidins) found in cranberry bind to P-fimbriated E. coli (mannose insensitive) thereby prevents the adhesion of E. coli to uroepithelial cells and reduces the ability of E. coli to cause an urinary infection.

D-Mannose, a naturally occurring, non-caloric, simple sugar, extracted from the Birch tree, inhibits adherence of E. coli type 1 fimbriae to uroepithelial cells which causes the majority of UTIs.

DDS®-probiotics contain the superstrain, Lactobacillus acidophilus DDS®-1 – a patented and trademarked strain from UAS Laboratories. DDS® probiotics have over 200 studies on a variety of health conditions including effects on Candida albicans and E.coli, responsible for urogenital infections.

This powerful combination (Cran-Gyn DDS®) inhibits E. coli related urinary tract problems, restores healthy microflora, improves digestive health and boosts immunity.

CRAN-GYN DDS® offers a natural alternative to the consumers for the management of their urinary tract infections, yeast infections and to support digestive health.

Like all DDS® probiotics, Cran-Gyn DDS® is non-dairy, gluten-free, soy-free, wheat-free, corn-free and non-GMO. The product is available in veggie capsules.

### About UAS Laboratories and DDS® Probiotics

UAS Laboratories, Inc. located at 9953 Valley View Rd, Eden Prairie, Minnesota, USA 55344 ([www.uaslabs.com](http://www.uaslabs.com)), is the leading probiotic company established in 1979 by Dr. S.K. Dash, the probiotic pioneer. UAS Labs provides DDS® Probiotic supplements to stores, in the USA and many other countries. It also provides private label probiotics and probiotic raw material. DDS Probiotics are backed by over 40 years of University research, U.S. patent and trademark. Dr. Dash, the president of UAS Laboratories, serves the International Probiotic Association as a Scientific Advisor and Vice President. He is also the Adjunct Professor of Nutrition and Food Science Department at South Dakota State University, Brookings, SD. Dr. Dash is the recipient of many national and international awards and honors for his many innovations in and contributions to probiotics.
